King Mongkut's Agricultural Journal

Title:.....

☐ If the author(s) did not use artificial intelligence (AI) in preparing the manuscript, the checklist below is not required.

☐ If the author(s) used artificial intelligence (AI) in preparing the manuscript, the checklist below must be completed.

Artificial Intelligence (AI) Use Checklist for Manuscript Preparation

No.	Checklist Items	yes (✓)	No (×)
A. Authorship & Accountability			
A1	Confirm that AI is not listed as an author or co-author of the manuscript, as AI cannot assume legal responsibility for published work.		
A2	All authors take **full responsibility** for the accuracy, integrity, and ethical standards of the entire manuscript, including content generated or assisted by AI.		
A3	All AI-generated content has been carefully **reviewed, revised, and fact-checked** by the authors, including numerical data, references, and analytical results.		
B. Content & Data Integrity			
B1	AI has **not been used to fabricate research data or results** that are not part of a reproducible research method.		
B2	**Important factual or evidential images, graphs, and diagrams** have not been generated or manipulated using AI, unless AI is an integral and reproducible part of the research methodology.		
B3	f AI has been used to generate references or citations; all references have been verified to ensure that they **actually exist and accurately support the cited content**.		
B4	**No confidential information, sensitive personal data, or unpublished manuscripts** have been entered into publicly available AI tools.		
C. Transparency & Disclosure			
C1	The use of AI has been **clearly disclosed** in the appropriate section of the manuscript, such as the Methods or Acknowledgements section.		
C2	When AI use must be disclosed, the **AI tool name** (e.g., ChatGPT, Grok, or Grammarly), **model/version** (e.g., GPT-4), and **purpose of use** (e.g., grammar improvement or abstract editing) have been clearly stated.		
C3	**AI use that generally does not require disclosure:** Basic grammar and spelling checks using standard proofreading tools (e.g., Microsoft Editor).
